## Make Lee Myles your CVT partner!

At Lee Myles Transmission AutoCare, we understand that quality alone is not enough; it must be accompanied by strong support. With our TD REMAN CVT Remanufactured Transmissions, you get both. Our CVT products are 100% tested with real world simulated driving conditions. Our technical support staff is the most knowledgeable in the industry and no one knows more about CVT transmissions than our team. Once installation is complete, we will have a mobile programmer with Nissan OE Consult III-Plus factory scanners go on-site to your shop and program your TCM software.

## Some of the components used in TD REMAN remanufactured Nissan CVTs are:

- Original equipment CVT belts
- Original equipment CVT chains
- Exedy® friction modules
- New factory valve bodies with solenoids and wiring harnesses

## OEM Nissan-Licensed Programming

Highly trained technicians will perform on-site programming using OEM-licensed tools (Consult III-Plus), eliminating the need to tow vehicles to a Nissan dealership. Avoid unnecessary long wait time at the dealer for programming or increase your cost with expensive towing fees.

## Industry-leading warranty

Lee Myles stand behind each of our remanufactured CVT units with our industry-leading warranty. Not only do we go beyond our competition— we go beyond the dealer! Dealer warranties often result in \$700 and more out-of-pocket expenses.

Vs.

## Dealer Warranty

Replacement unit with \$250 labor claim.

Replacement unit only after dealer approval

**18 month  
18k mile  
Warranty**

Repay for towing to dealer

**Upgrade to an Extended Warranty  
36 months/36k miles with \$60 labor rate.**
